YUGOSLAVIA PUSHES ELECTRIFICATION;
SOFIA RESTRICTS POWER CONSUMPTION

BOSNIA GETS NEW POWER LINES -- Slovenski Porocevalec, No 160, 7 Jul 50

The 40-kilometer Vlasenica-Zvornik and the Kakanj-Bjelo Polje-Zenica high-tension power lines, both of 35 kilovolts, will be completed soon. In the near future, construction will begin on the 110-kilovolt power line between Mostar and the "Tito" Hydroelectric Power Plant on the Cetina River near Split. The Sarajevo-Konjic-Jablanica power line also is scheduled to be constructed soon.

During the first 6 months of 1950, 94 kilometers of power lines were constructed in Bosnia and Herzegovina, including the Doboj-Lukavac, Zenica-Kakanj, Mesici-Sarajevo, and Mesici-Gorazdo /Gorazde/ lines.

With the new lines, the new hydroelectric power plant on the Praca River near Mesici will be able to supply power to Sarajevo and Gorazdo.

This year, as many power lines will be constructed in Bosnia and Herzegovina as were constructed in all prewar Yugoslavia in 20 years.

NEW POWER PLANT TO BE IN OPERATION SOON -- Slovenski Porocevalec, No 158, 5 Jul 50

Before the end of 1950, the hydroelectric power plant on the Zeta Falls, with over 2,000 horsepower, will be completed. It will provide power for Titograd, Danilovgrad, and the pumping system along the Zeta River, which will irrigate the Bjelopavlicka Plain. The high-tension power line from the power plant via Danilovgrad and Spuz to Titograd has been completed.

POWER PLANT NEARS COMPLETION -- Slovenski Porocevalec, No 153, 29 Jun 50

The main construction work on the Ozalj II Hydroelectric power plant on the Kupa River was completed recently. The machinery will be installed in the

fall of 1950. The two 1,350-horsepower Kaplan turbines are being made by "Lito-stroj," while the two generators are under construction in the "Rade Koncar" Enterprise. The power plant, which will have a capacity of 2,700 horsepower or 2,000 kilowatts, will produce about 10 million kilowatt-hours of power per year. The plant will supply Bela Krajina and Karlovac and vicinity with power. It is scheduled to be in operation before the end of 1950.

COMPLETES HIGH-TENSION POWER LINE -- Borba, No 153, 3 Jul 50

Ohrid, 2 July -- The 13-kilometer high-tension power line between Ohrid and Struga was put into operation on 1 July 1950. The power line connects the hydroelectric power plant in Ohrid with the power plant in Struga. During the day, the Ohrid power plant will supply Struga with current, and during the night the city of Ohrid will utilize the excess current from the power plant in Struga.

When the hydroelectric power plant in Pesocani begins to operate, the high-tension power line will transmit the current from this plant to Struga and Ohrid.

TO MAKE ELECTRICAL APPLIANCES -- Slovenski Porocevalec, No 161, 8 Jul 50

On the left bank of the Sava River near the Crnuce bridge, in Slovenia, the "Elma" Electrical Appliances Factory is under construction. The main building will be finished this year. It will produce electrical equipment for power lines and various household electrical appliances.

ANNOUNCES NEW POWER PLANTS -- Broba, No 150, 25 Jun 50

The Jajce III power plant is to be built in the future on the lake formed by the Pliva River. The Jajce V power plant is already under construction in the village of Sipovo.

RESTRICTS POWER CONSUMPTION IN EVENING -- Izgrev, No 1731, 12 May 50

The power enterprise of the Sofia People's Soviet reminds the public that power for domestic purposes may not be used from 1930 to 2200 hours. The same restriction applies to plants and enterprises working on one shift only. Violators will be deprived of power, and whereas private consumers will be fined 20,000 leva, enterprises will pay a 200,000-leva fine.
